

Lorain Area Recovery Coaches

Active Roster

Please note that this list will be updated as often as new information is received. All of the Recovery Coaches listed below have been trained in the Recovery Coach Academy. While each has a connection to recovery and a passion for working with recovering people, questions regarding personal recovery journeys can be directed to the coach him/herself. All coaches are equally capable of working with any recoveree, but the profiles provided are features that may make that Recovery Coach a good match for a particular recoveree. Please be aware that some Recovery Coaches may have procedures and policies that they follow through their agencies. Again, this is a question to ask the individual Recovery Coach. If you are in need of connections in other areas, ADAS has access to lists of Recovery Coaches in other counties.

If you are in need of a Recovery Coach or are working with someone who may benefit from a Recovery Coach, you may contact a coach directly using the contact information listed below:
